EvoCount M2

Intelligent Mix Coin Counter

EvoCount M2 is ideal to balance, detect and presort coins in a safe, quick and reliable manner. The unit is suitable for deposits in bank branches as well es for heavy duty applications as in cash centers with shift-operation.

FOR FASTER AND BETTER PROCESSING

The flexible sorting system allows off-sorting , when needed 30% faster than classic mix counters if they run at the same speed. Currency off-sorting possibility simplifies post-processing in cash centers. Dual currency operation, when possible allows a better service to you customers and better operation in branch and in post-processing.

CONVENIENT TO USE

Hopper, buttons, touch-interface, screen printer and coin path are all well positioned and user friendly. No need for bending or standing. The large but still very low hopper allows perfect visibility and facilitates the machines' feeding. Screen, buttons and functions can be adapted to your companies' work-flow requirements.

- 5 physical and customizable quick access buttons
- TFT color touchscreen with multi-language user interface
- Removable reject pocket
- Protocol of deposits incl. denomination details.
- 3 bag stop levels
- Functions and screen customizable by site administrator
- Direct access to disc and coin transport without the need to remove coins
- Hopper capacity of 3,000 coins (Standard Euro-Mix) and 5,500 coins max.
- Integrated cash management software

COMPLIANCE

With reliable forged coin detection, EvoCount™ also provides excellent foreign coin rejection levels proven through vigorous testing.

- cashDNA™ Dual Sensor System
- Motor and electronics run on low voltage
- Compliant to OSH regulations
- Compliant to EU1210/2010

DURABLE AND EFFICIENT

High Speed coin processing, flexibility and reliability makes your coin processing more efficient.

- Up to 1,000 coins per minute with full detection
- Dual currency operation
- Semi-automatic feeding via wide and easy accessible hopper
- 1/1/1 pocket system
- Durable materials
- Dust removing system
- Ideal for token processing

PERFECT FOR MIXED CURRENCY

The units' features secure a smooth processing in mixed currency environment, whether you are in a border region, in a currency changeover or you have multiple currencies circulating

- High detection level with multiple sensors allows more security with dual challenges of forgeries, foreign coins and crossovers.
- 2 Currencies can be counted together while giving totals and details separate by currency.
- Dual electronic sorting allows pre-sorting of the currencies while counting them together.
- During a currency change over you can continue using your existing coins sorter since the new currency will be separated in the first step.
- Easy activation / deactivation of complete currencies or specific coins.
